For more information or to get involved, visit [www.citizensonpatrolmb.ca](http://www.citizensonpatrolmb.ca).

## Radon

Dauphin and the surrounding area have been identified as having high levels of radon, so it is very important that you get your home tested to protect your family's health. Radon is an invisible, odourless, radioactive gas that comes from the breakdown of uranium in the soil and enters homes through cracks in the foundation, gaps around pipes, and other small openings. Radon levels can vary from home to home, even within the same neighbourhood, and testing is the only way to know if you are at risk. More than 3,000 Canadians die each year from radon-induced lung cancer, so please take action to reduce the radon levels in your home. Testing is easy, and mitigation is very effective at significantly reducing your radon exposure. For more details on how to protect yourself from radon, visit <https://dauphin.ca/p/radon>.

## Emergency Preparedness

Emergencies can happen anytime. It's important to understand the risks in our area – such as severe storms, train derailments, power outages, or wildfires, to name a few. Make a household emergency plan and build an emergency kit. Learn more at [dauphin.ca/p/emergency-preparedness](http://dauphin.ca/p/emergency-preparedness).
