

PUBLIC NOTICE FALL CLEAN-UP

The City of Dauphin Fall Clean-Up campaign will commence **Tuesday, October 11, 2022**. City crews will be making one pass through the City starting with Day 4 area on the garbage schedule. Once Day 4 area is complete, crews will continue in reverse through the remainder of the four-day cycle. This will be a **one time pickup only**, so have your yard waste ready for pickup prior to the crews arrival.

In accordance with City By-Law No. 09/2016, City crews will only be collecting the following at no cost:

- Accumulated garden waste
- Grass
- Leaves
- Shrubs & tree branches less than six (6) inches in diameter(8 feet maximum and piled parallel).

These items will only be collected if they are free of household waste, hazardous waste and recyclable materials, and are in a clearly identifiable pile or **packaged in biodegradable bags/boxes**. Material other than listed above will NOT be collected, and City crews will not sort through the items.

The Fall Clean-Up campaign will occur in the back lanes, so place the items listed above near your back lane for pick-up. Those residences that do not have a back lane, place your items on the boulevard near the curb. Large equipment will be used so it is important to place the items close to the lane or curb to avoid property damage.

Compost material can be dropped off anytime at the City Waste Disposal Site, northwest of Dauphin **Absolutely no plastic bags, household or commercial garbage or scrap in the compost site.**

The public's cooperation in assisting the City of Dauphin Public Works crew is greatly appreciated. If you require additional information or further clarification, or to order a Green Yard Waste Bin call the City Shop at 204.622.3202.
